

Project Manager

DELFT, THE NETHERLANDS

About Meatable

We are on a mission to make 100% real, delicious meat, without the negative impact on our climate and the need to raise and slaughter animals.

The Meatable approach for creating 'cell-based' meat is based on ground-breaking proprietary technology that was developed at The University of Cambridge and allows us to turn induced pluripotent stem cells (iPSCs) into muscle and fat cells, creating 100% real, delicious, guilt free meat. We use iPSCs because they have amazing benefits that enable affordable, at scale production (e.g. they are pluripotent, grow completely serum free, have unlimited proliferation capacity and can grow in suspension). With our technology, scalable cell-based meat production is becoming a reality.

We are a young and fast-growing company and are entering our next wave of growth. Given our size, new team members will be a huge part of our motivated multidisciplinary team. Our culture encourages everybody on the team to actively shape their position and we provide ample opportunities for personal and professional growth.

Project Manager

DELFT, THE NETHERLANDS

About the role

We are seeking an experienced Project Manager. Someone who will be responsible for the project management activities including project planning, execution, control, and responsible for project portfolio management. As a key member of our R&D team you will be working closely with our team leads and report to our VP of R&D.

We are looking for an excellent communicator who is self-directing with an agile mindset, since you will be working in a fast-moving environment where things can and will change quickly.

Your main responsibilities will include the defining of project objectives and scope and the developing of an integrated project plan. You will lead the project execution and periodic project reviews of both internal projects as projects executed with (partially) externals. You will provide project management coaching and development for team members as appropriate. Next to that you will keep the team focused on project objectives, budget, and timely delivery of results.

If you feel you match this profile and if you thrive in a highly motivated multi-disciplinary team, you are just the person we are looking for!

Project Manager

DELFT, THE NETHERLANDS
