

Technician Stem Cell biology

DELFT, THE NETHERLANDS

About Meatable

We are on a mission to make 100% real, delicious meat, without the negative impact on our climate and the need to raise and slaughter animals.

The Meatable approach for creating 'cell-based' meat is based on ground-breaking proprietary technology that was developed at The University of Cambridge and allows us to turn induced pluripotent stem cells (iPSCs) into muscle and fat cells, creating 100% real, delicious, guilt free meat. We use iPSCs because they have amazing benefits that enable affordable, at scale production (e.g. they are pluripotent, grow completely serum free, have unlimited proliferation capacity and can grow in suspension). With our technology, scalable cell-based meat production is becoming a reality.

We are a young and fast-growing company and are entering our next wave of growth. Given our size, new team members will be a huge part of our motivated multidisciplinary team. Our culture encourages everybody on the team to actively shape their position and we provide ample opportunities for personal and professional growth.

Technician Stem Cell biology

DELFT, THE NETHERLANDS

About the role

We are seeking an enthusiastic technician with working experience with pluripotent stem cells to join our Cell Line Development team.

You will be involved in the derivation and characterization of new pluripotent stem cell lines, in particular iPSCs.

As a research technician, you will participate in the design, execution, and optimization of these experiments, as well as characterizing outcomes and efficiency. You will be working with iPSC experts to guarantee that our patented animal cell lines perform at their best and that they can be used in a food-grade process to generate our meat products.

We are looking for a new team member with proven experience in culturing pluripotent stem cells, in particular iPSC. You will be an essential part of our multidisciplinary team of researchers, working both independently but also as part of a larger team. The ideal candidate has a strong work ethic, a critical mind, and excellent communication skills.

Are you highly skilled in cell culture, experienced in working with iPSC or other mammalian pluripotent stem cell lines from different species? Are you looking for a hands-on opportunity to make a difference and impact how meat reaches our tables?

Yes? Please apply following the link below :-)

Technician Stem Cell biology

DELFT, THE NETHERLANDS

Qualifications

- ▶ B.Sc. or M.Sc. in Stem Cell Biology, Cellular Biology or related field.
 - ▶ Proven experience in mammalian cell culture and specifically with iPSC.
 - ▶ Experience in molecular and cellular biology techniques such as FACS, qPCR, Fluorescent Microscopy.
 - ▶ Minimum of 2 years hands-on experience with development and characterization of iPSC lines using different reprogramming techniques.
 - ▶ Experience working under GMP will be favoured.
-

Meatable offers

- ▶ A competitive salary
 - ▶ Participation in our employee stock option plan
- ▶ A dynamic work environment in a new exciting field using cutting edge technologies, working with the leaders in the field
 - ▶ A caring culture with strong emphasis on team performance and personal development

If you think there is a match we would love to receive your CV and a short motivation prior to the **9th of February**
