

Media Formulation Technician

DELFT, THE NETHERLANDS

About Meatable

We are on a mission to make 100% real, delicious meat, without the negative impact on our climate and the need to raise and slaughter animals.

The Meatable approach for creating ‘cell-based’ meat is based on ground-breaking proprietary technology that was developed at The University of Cambridge and allows us to turn induced pluripotent stem cells iPSCs into muscle and fat cells, creating 100% real, delicious, guilt free meat. We use iPSCs because they have amazing benefits that enable affordable, at scale production (e.g. they are pluripotent, grow completely serum free, have unlimited proliferation capacity and can grow in suspension). With our technology, scalable cell-based meat production is becoming a reality.

We are a young and fast-growing company and are entering our next wave of growth. Given our size, new team members will be a huge part of our motivated multidisciplinary team. Our culture encourages everybody on the team to actively shape their position and we provide ample opportunities for personal and professional growth.

Media Formulation Technician

DELFT, THE NETHERLANDS

About the role

As a Media Formulation Technician you will be responsible for the preparation, the optimization and testing of the media used in production of our cultured meat. As an important member of the Ingredients Team you will work closely together with our Media Experts but also multidisciplinary with our entire science teams to develop the best possible media for our processes.

A significant part of the role will be hands-on work in our R&D facility. You will perform experiments to test the new formulations of media and evaluate the results using various analytical procedures. Another important part of your work will be the maintenance of ingredient stock as well as the collection and evaluation of ingredient specifications and documentation. For this position we are looking for a highly motivated person with the attention for details and experience in cell culture and media formulation.

If you have that eye for details, match the qualifications mentioned below and if you thrive in a highly motivated multi-disciplinary team and if you want to be part of a cutting-edge research field, you are just the person we are looking for!

Media Formulation Technician

DELFT, THE NETHERLANDS

Qualifications

- ▶ MSc. in Cell Biology, Biotechnology, Bioengineering, or related field, with 2+ years work experience, preferably in industry.
- ▶ Proven substantial experience with developing, growing, maintaining, and differentiating iPS cells.
- ▶ Knows molecular and cellular techniques such as FACS, qPCR, Fluorescent Microscopy
- ▶ Experience in developing and testing new cell culture media formulations and/or working with mammalian cells under GMP and GLP regulations is highly desirable.
- ▶ Experience in ingredient sourcing and stock management is desirable.
- ▶ Knowledge of the current best practices for developing cell culture media including nutritional ingredients, metabolomics, media chemistry, functionality assays, and spent media assays is nice to have.

Meatable offers

- ▶ A competitive salary
- ▶ Participation in our employee stock option plan
- ▶ A dynamic work environment in a new exciting field using cutting edge technologies, working with the leaders in the field
- ▶ A caring culture with strong emphasis on team performance and personal development
